

Job Description (JD):

- Assist in developing AI & Machine Learning models.
- Collect, clean, and preprocess datasets.
- Perform data analysis and visualization.
- Train, test, and optimize ML models.
- Support the development of AI-powered applications.
- Research emerging AI technologies and implement innovative solutions.
- Prepare technical documentation and reports.
- Collaborate with cross-functional teams on live projects.

Eligibility:

- Pursuing or recently completed a degree in Computer Science, IT, AI, Data Science, or a related field.
- Basic knowledge of Python and Machine Learning concepts.
- Familiarity with libraries such as NumPy, Pandas, Scikit-learn, TensorFlow, or PyTorch is an added advantage.
- Strong analytical and problem-solving skills.
